THE MEASURING STICK OF THE TRACTOR INDUSTRY

The University of Nebraska, which is the Standard for
United States and Canada in their Official Test No. 134, has
the following to say about the WALLIS Certified Tractor.

The WALLIS Tractor pulled 75% of its weight on the
Drawbar at 2.98 miles per hour.

It delivered 76.55% of its maximum belt power to the
Drawbar.

It delivered one HORSE POWER at the drawbar for
each 168 lbs. of its Lincoln Test Weight (4523 lbs.)

It developed 87.68 horse power with each U.S. gallon of
fuel used (Which was the HIGHEST FUEL economy
ever officially recorded for any wheel tractor ap-
proaching it in piston displacement and weight.

It pulled 27.05 h.p. on low Gear at 2.98 MPR.

It pulled 26.36 h.p. on high gear at 3.77 MPR.

According to the standards of the American Society of
Automotive Engineers, Test No. 134 entitles the Wallis Cer-
tified to a rating of 20 h.p. delivered to the drawbar and 30 h.p.
delivered to the belt.

Compare the above showing with any other tractor offi-
cially tested and note the vast difference in favor of the Wallis

JUNIOR BASEBALL IS ORGANIZED FOR SEASON

A meeting of those interested in
baseball was held in the Municipal
office on Tuesday night and a large
number of citizens were present.

It was decided to have a junior
team this year, and the following
officers were elected for the season:

President R.H. Purdy
Vice-Pres. J.M. MacDonald
Sec.-Treas. Jas. McLeod
Executive: P. Edwards, J. A.
MacDonald and L. Poxon.

The Secretary was instructed to
write to Swalwell, Three Hills,
Trochu, Acme and Rockyford, ask-
ing them if they would join in a
Junior League this year, the age
limit for players being 18 years.

W. A. BRAISHER IS THE PRESIDENT OF TENNIS CLUB

A meeting of the Carbon Tennis
Club was held in the Municipal of-
fice last Thursday evening, but
very few players were present.

The following officers were elect-
ed for the year:

Hon. Pres. Chas. Burnett
President W.A. Braisher
Vice-Pres. Mrs. Laing
Sec.-Treas. Hugh MacDonald

It is the intention of the Club to
have two courts this year, these to
be situated in the park grounds.

The fees for this season were set
as follows: Gents \$3. Ladies \$2.
School children \$1.00.

An interesting phenomenon was
recorded in the vicinity of Carbon
last Tuesday, April 24, when Mrs.
E. P. Johnson, who lives about 11
miles north east of Carbon, noticed
something peculiar lying near the
barn and on examining the object
found that it was an instrument of
the Meteorological Service of Can-
ada, which was enclosed in a metal
case and in the shape of a kite.
Sometime ago these instruments
were released in the form of a kite
with a balloon attachment, and
were for the purpose of finding out
more about the upper air conditions.
When the balloon burst or the in-
strument came to earth there was
a tag attached saying that the find-
er would be entitled to a reward
if the tag were returned to the
Department and the instrument
just as it had been found.

ELKS LODGE IS FORMED IN CARBON

Carbon was the scene of an inter-
esting event on Wednesday even-
ing, April 25, when the Trochu
Elks instituted Carbon Lodge No.
195, B.P.O. Elks, with forty-two
names on the Charter membership
list.

The Installation ceremony was
conducted by Dr. J. L. Gibson, D.
D.G.E.R. and S.S. Savage, presi-
dent Alta. Elks Assn, assisted by
Dr. W. Spankie of Calgary Lodge,
E. A. Shoebotham, Sec.-Mgr. of
Calgary Lodge, and Tony McKin-
ley, Sec. of the Alta. Elks Assn.

The institution of the candidates
for the new lodge was conducted
by the officers of Trochu Lodge No.
168, as follows: E. R., A. Hess.
L.K., J.J. Kehoe, Loyal Knight,
D. G. Gilchrist, Lecturing Knight,
Dr. Snyder, Esquire, J. Wolfe,
Secretary R. Farris, I. G. P. Mc-
Neil, O.G. W. Wolchow.

Following the initiation ceremony
the officers for the Carbon Lodge
No. 195, B.P.O.E. were installed
as:

Past Exalted Ruler L. Poxon
Exalted Ruler J.A. MacDonald
Leading Knight A.F. McKibbin
Loyal Knight J. J. Greenan
Lecturing Knight R. S. Shaw.
Secretary Alex Davis
Treasurer and Pianist R.J. Fair-
bairn

Esquire G. Peters
Chaplain S. F. Torrance
Inner Guard G. Cadman
Tyler G. F. McGregor
Historian E. J. Rouleau
Trustees: C.H. Nash, Geo. Mal-
ton and John Leiske.

Following the Initiation cere-
mony and Installation of officers re-
freshments were served and after a
short musical program addresses
were delivered by Dr. Gibson, S.S.
Savage, E.A. Shoebotham and Dr.
W.E. Spankie, of Calgary, A. Hess
of Trochu, Wm. Hart of Three
Hills, and J.A. MacDonald, newly
installed Exalted Ruler of Carbon
Lodge.

Besides the above mentioned of-
ficers many visiting brethren were
present from Three Hills and Tro-
chu.

The music during the evening
was provided by the Trochu Elks
Orchestra.

READ THE ADVERTISEMENTS!

CARD PARTY IN SCHOOL IS FINANCIAL SUCCESS

The card party, which was held
in the Carbon school on Friday ev-
ening under the auspices of the
Golf Club, was a financial success
and although the crowd was not
as large as was expected, all that
were present enjoyed the evening's
entertainment. Both bridge and
whist were played and following a
dainty supper the prizes were
awarded as follows: Bridge, Ladies,
Mrs. C. H. Nash, Gentlemen, H.
Willson. Consolation, Mrs. G.
Peters and H. J. Clever. In whist
Mrs. Heath won the ladies' prize,
Wilfred Poxon the gents, and Mrs.
T. R. Olive and Cyril Poxon the
consolation.

Tickets were sold for a ton of
coal, which was generously donat-
ed by J. H. Oliphant, and in the
raffle Geo. Zeigler was the winner.
The coffers of the Golf Club were
enriched by about \$35 from the ev-
ening's entertainment.

A meeting of the members of the
Curling Club will be held in the
Municipal hall on Monday night
at 8 p.m. for the discussion of the
Sports Day. A full attendance is
requested.

I. Guttman was a Calgary visi-
tor over the week end.

Miss Velma Mackay returned to
Carbon last Tuesday.

Mr. and Mrs. W. Herbert and
son were Calgary visitors last week
and returned on Saturday.

A.N. (Tony) McKinley, Grand
Organizer of the Elks, left on Sat-
urday for Calgary after spending
the past five weeks here organizing
Carbon Lodge No. 195, B.P.O.E.

A number of our citizens are re-
ported to have the mumps. There
seems to be another epidemic of
this disease and some of the grown
ups have been very ill. Wouldn't
it be a wise move to place a strict
quarantine on these cases?

Mr. Ed Smith of Drumheller, ar-
rived in Carbon on Thursday and
that day, with the help of Mr. En-
glish, completed the inventory of
the Imperial Lumber Yds. Ltd.

Empire Builders

Empire Shopping Week, which was observed throughout Canada last month, appears to have made an especially strong appeal to the people of Western Canada. This may be surprising to many people in the Eastern provinces who are still laboring under the delusion that British and Empire sentiment is not overly strong in the West, and that it has been weakened by the influx of settlers of other than British origin. But it is not surprising to the average Westerner; on the contrary, to him it is but the natural outcome of the thought and outlook of the West.

It is not in the East, but in the West, that the strongest approval is given to the British Preference feature in the Canadian tariff, and it is in the West, rather than the East, that public opinion favors further, albeit gradual, extensions of that Preference with a view to a lowering of duties and still greater encouragement of British trade in this Dominion. In fact, there is a very strong sentiment in the West which would welcome the development of Preference to the point where all customs duties on British-made and British-produced goods were wiped out entirely.

Empire Shopping Week had for its object the focussing of people's attention upon certain economic factors in the development of Canada as a component part of the British Commonwealth of Nations and of the Empire as a whole. Undoubtedly, sentiment provides a mighty urge to all Canadians to give a voluntary preference to Empire goods when making purchases, but, as was the case with prohibition of the liquor traffic, sentiment is not in itself sufficient. It is the economic factor which, in these modern days, provides the most powerful argument. And Western Canada is profoundly interested in the economic factor.

World trade today is, as it has always been and always will be, a system of barter—the exchange by one country of those products and articles of which it produces a surplus to another country which requires these things, and to accept payment therefore in other goods of which such country produces a surplus but which the first mentioned country requires to import. Money is merely a convenient means of effecting such exchange. In other words, trade between nations operates on exactly the same principles as trade between individuals.

Western Canada, and Canada as a whole, has a surplus of products to sell. If those countries which require the things Canada has to sell are to be in a position to buy and pay for them, we must, in turn, buy from those countries the things they have to sell and which we cannot or do not produce ourselves and must import.

Last year Canada sold to the rest of the British Empire \$200,000,000 more products than we purchased from them. On the other hand, Canada bought over \$200,000,000 more from the United States than we sold across the line. Canada was enabled to pay the United States for the excess of goods imported because of its excess of sales to other parts of the Empire. While Canada did not lose by this procedure, the Empire did not gain; in fact, it sustained loss.

Now as our major exports must cross the seas to Great Britain, Ireland, Australia, New Zealand, South Africa, it will be to Canada's advantage, in a purely business way, to buy as largely as possible in those countries and thus provide return cargoes for the ships which carry Canada's products into the markets of the far-flung British Empire. The larger these return cargoes, the more profitably can the vessels be operated, the greater the number of ships that will be put on these ocean lanes of transportation, the keener the competition for the business, and, as an inevitable economic result, the lower the freight charges levied on both out-going and in-coming shipments.

The more Canada buys from its sister nations in the British Commonwealth, the more they can buy from us. The one reacts on the other, and trade both ways can thus be built up and grow like the proverbial snowball. It has long been declared that "trade follows the flag," but it is also true that the flag has followed trade, and to the traders of the past we largely owe the Empire of today.

It is equally true that the development of inter-Empire trade has a direct and pronounced effect on immigration, and, inasmuch as Canada is particularly anxious to secure a larger proportion of British settlers, the more we trade with Britain, the more widely will Canada and Canadian products and Canadian resources and possibilities become known among the British people.

The slogan of Empire Shopping Week is indubitably true—"Empire Buyers are Empire Builders." Let Canada build by buying.

Charity covers a multitude of sins and a tailor covers a multitude of sinners.

The man who always does as he pleases is often displeased with what he does.

Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. But don't use crude helps. Use what your doctor would advise. The best help is Phillips' Milk of Magnesia. For the 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

Uncanny Inventions

Exhibited In London

One Machine Types, Adds, and Multiplies At Same Time

Uncanny efficient inventions were to be seen at the Business Efficiency Exhibition at Holland Park Hall, London, Eng., recently. The devices shown included: An electric machine that opens envelopes at the rate of 30,000 an hour. A machine that types, adds, and multiplies at the same time. A machine that seals, franks, counts, postmarks and prints a slogan on envelopes at the rate of 300 per minute. Portable typewriters in collars to match the home or personal color scheme. A lock which records on a tape the time the door is opened, by whom, and whether from the outside or inside of the room.

NEGLECTED ANAEMIA

Often Leads To the Most Serious Consequences

In no disorder is delay or neglect more dangerous than in anaemia. Usually the first noticeable signs are pale lips and cheeks, dark rims under the eyes and a feeling of weariness. Then follow headaches, backaches, palpitation and breathlessness. The only way that anaemia can be overcome is to enrich the blood, and it is because of their wonderful blood-enriching and blood-making properties that Dr. Williams' Pink Pills have won such great success in the treatment of this often most stubborn disease.

Thousands of young girls who were in an anaemic condition owe their present good health to Dr. Williams' Pink Pills. One of these, Miss Katie McEachern, Port Hood, N.S., says:—"I praise the day I began the use of Dr. Williams' Pink Pills. I had not been feeling well for some time. I was very pale, had severe headaches, dizzy spells and occasional fainting spells. The least exertion would leave me tired and breathless. In this condition I began taking Dr. Williams' Pink Pills. I continued their use until I had taken six boxes, by which time I was again enjoying good health. I hope my experience will lead other sufferers to give this medicine a fair trial."

If you are at all run-down, or weak, you should begin at once to take Dr. Williams' Pink Pills and you will soon be well and strong. These pills are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

Has Unusual Occupation

For twenty-three years Lawrence Quinn, chief oysterman at the Hotel Lincoln, New York, has been opening oysters for a living. He opens an average of 3,900 oysters a day, and during his twenty-three years in this work has found dozens of pearls. None of the stones were of fabulous value, but there have been enough small ones to make a very fine necklace and some pendants, and Quinn still has hope that some day he will pick up one that will be of real value.

Miller's Worm Powders do not need the after-help of castor oil or any purgative to complete their thoroughness, because they are thorough in themselves. One dose of them, and they will be found palatable by all children, will end the worm trouble by making the stomach and bowels untenable to the parasites. And not only this, but the powders will be certain to exert most beneficial influences in the digestive organs.

"Dry Ice" New Idea

Substitute Has Been Used Successfully In States

By the use of "dry ice," or solidified carbon dioxide, the price of ice cream will be cut considerably within the next few years, says Fred Rasmussen, of Harrisburg, executive of the International Ice Cream Manufacturers' Association, during the annual convention of the body.

Only fifty pounds of the "dry ice" will supply the needs of an ice cream delivery truck for nearly a day, he declared, and use of the substitute will spread rapidly when it is made in quantity. It is now being used in transporting ice cream by truck from Philadelphia to Atlantic City.

Winnipeg Population

The official figure of the population of Winnipeg proper for 1928, as given by the Assessment Department, is 202,377. Not since 1910 has the 200,000 mark been reached. This year's figure is exceeded only by the population totals for 1914 and 1915, when the figures were 203,255 and 212,889 respectively.

Minard's Liniment for falling hair.

A Region Of Wondrous Beauty

Plan Is Made For Establishment Of Government Park In Bella Coola Valley, B.C.

If you like to get out in the wild country and hunt wild animals, such as grizzlies, with the camera, by all means go to the Bella Coola Valley, B.C. I have spent the last four summers there, and I am advocating the establishment there of a Dominion Park to be known as Mackenzie Park, in honor of the first white man who crossed Canada and who reached the sea at that point—this to be connected up by means of a highway to be known as Mackenzie Highway, paralleling part of Mackenzie's route so that people can go from New York to California and to Bella Coola over the Mackenzie Highway, visiting Mackenzie Park and returning by way of the Rocky Mountains Park, and so on. This would bring money into British Columbia and Canada. If the Dominion will not carry out this plan I hope to get some wealthy men interested, as the region is one of wonderful beauty. Within a distance of 70 miles, it is easily traversed in one day by motor boat or auto; the can visit both the so-called rainy coast and the desert interior. One can go from sea level to 12,000 feet, can have boating on both salt, fresh, swift and still waters, paddling, poling, motor boating, sailing, etc. There is excellent trout fishing and good animal photography, grizzly bears being very numerous. Thousands of water falls, one of them over 800 feet high; 18 glaciers may be seen from one place, and there are many others. It costs only \$40.00 for a round trip from Vancouver by boat through the fjords of the Noitway of Canada. I have taken my first moving picture, showing life in this region. Board in the valley can be had at 50 cents a meal, good cream, fresh fruit, kindly, nice people, largely of Norwegian descent, noted for cleanliness, and good cooking. Please let me know of anybody who will help me get this park and highway established. We should get about 20 miles wide by 70 miles long of country which is still in the Crown; that is, it is government land, and it is of practically no other value except for park purposes. —Harland T. Smith, Department of Mines, Ottawa.

Forest Effect On Temperatures

Forests have an equalizing effect on extremes of temperature. Records for Canada show that in forested districts maximum temperatures are lower and minimum temperatures higher than in adjoining deforested tracts.

FIRST CONTRACTS AWARDED

Canada's Air Mail Service Will Eventually Cover Dominion

The nucleus of a transcontinental aerial mail service is being established by Canada with the awarding of contracts for four important mail services. Eventually letters will cross the country from Halifax to Vancouver in 36 hours by aeroplane, instead of in five days by railway as at present.

The contracts now entered into provide for a service between Father Point and Montreal and Ottawa, another service of four trips per week between Montreal and Toronto, and all year-round service between Montreal and Albany, N.Y., to connect with the United States Transcontinental Air Service. The total cost will be \$201,150.

The Father Point to Montreal service and the Montreal to Ottawa service will be provided by the Canadian Transcontinental Airways, Limited, of Quebec, the Father Point to Montreal section costing \$49,500, or \$1.25 per flying mile. The Montreal to Ottawa service is to cost \$8,250 for the season. For the Montreal-Toronto service the cost will be \$40,500, or \$1.25 per flying mile, and the Montreal to Albany service will cost \$95,900.

According to J. A. Wilson, Director of Civil Aviation in Canada, 60 per cent. of the Royal Air Force pilots during the war were Canadians. Since the war Canada has been devoting her activities to such operations as forest protection, surveying, mapping, and the assisting of engineering and geological survey work in the northern region. It would take some time to build up a transcontinental air mail service, owing to the sparse population of the Dominion, but eventually the people would demand more rapid service than could be given by the present method.

An Oil That Is Prized Everywhere.—Dr. Thomas' Electric Oil was put upon the market without any flourish over fifty years ago. It was put up to meet the wants of a small section, but as soon as its merits became known it had a whole continent for a field, and it is now known and prized throughout this continent. There is nothing equal to it.

A Chicago manufacturer has invented a photographic machine that can produce 4,000 finished prints in an hour.

Minard's Liniment for Toothache.

It is estimated that \$100,000,000 is annually spent in U.S. for retail store display advertising.

HERCULES

PERMANENT BUILDING PAPER

Smooth the Bumps on the Sales Road

Regardless of price, if quality is in the merchandise, it is half sold.

Hercules Permanent Building Paper is tested and proven wind proof—absolutely. Hercules not only aids in selling but brings repeats. Hercules also has the quality of toughness which, making it easy to use without fear of tearing or cracking, appeals strongly to the user.

Hercules—in three grades, x, xx, xxx—will smooth your building paper sales road. Samples sent on request.

Here and There

(50) Victoria. — The area of forest land in British Columbia dedicated to future forest production is 5,860,000 acres, according to a Government report.

Calgary. — Plans are actively under way by the Calgary Terminal Grain Company to build a seven hundred thousand bushel elevator at Vancouver. It is announced by A. R. Betts, manager of the company. Mr. Betts said that an eminently suitable site had been secured on the north shore, approximately opposite Spillers elevator.

Five special trains carrying around 1500 pilgrims passed through Montreal recently on their way to Quebec City and the shrine of Ste Anne de Beaupre also visiting the shrine of St Joseph in Montreal on their return trip. They were from the church of St Aidan, Jersey City and under the care of Father Thomas M. Curry, parish priest, were on their annual pilgrimage to these shrines.

Shipments of freight destined to points in the north-west of Canada via Port McNicoll, Ont., on the Canadian Pacific lake and rail route will now be accepted, the earliest date being April 9. There will be five steamers in the company's lake service between Port McNicoll and the head of the Lakes during the coming season. Through passenger service will be resumed this season from Owen Sound May 7 and from Port McNicoll, May 19.

Installation of Mack Tractors and Lapeer Trailers for rapid movement of freight from Canadian Pacific depots to and from outlying terminals has now been completed in Montreal and will shortly be in use in Toronto. The tractor is immediately attachable to one or more of these trailers which each can hold up to 15,000 lbs of freight and can be as swiftly disconnected. They are expected to immensely expedite the movement of C. P. freight.

Immigrants are flowing into Canada at record rates since lately and Canadian Pacific steamers from Great Britain and Europe are bringing them over at the rate of shiploads of close on a thousand per ship. The majority are farm laborers of British and North European stock and are mostly going in the land in the Prairie Provinces with a fair proportion going to Ontario and the Maritime Provinces.

Winnipeg. — Despite the heavy movement of immigrants to the West during the past two weeks, more positions are open on western farms than the railways and employment agencies can fill, immigration and employment officers state. Thousands of vacancies, the officers said, had been reported. Likelihood of an earlier commencement of seeding operations is generally conceded in the West, they added, and unless immigration continues at its present high peak the opening of operations on the land may find western farmers short-handed.

As the result of a conference between members of the Sheep Breeders' Association, financial representatives and members of the Winnipeg and Brandon Boards of Trade, a movement is under way for the placing of 100,000 sheep annually on Manitoba farms. These will be sold in groups of fifty to each farmer, somewhat similar to the plan now in operation in North Dakota. J. D. McGregor was appointed temporary chairman of a committee to make further arrangements for the carrying out of this plan.

THE HIDDEN PLACES

WHERE QUALITY COUNTS MOST

1 **Body** The emblem "Body by Fisher" stands for modern styling, safe, substantial construction . . . lasting beauty, and a score of important contributions to your comfort.

2 **Chassis** Compare the "Bigger and Better" Chevrolet Chassis with any other car in the low-price field. Look at its rugged, 4 3/4" deep steel frame, its sturdy cross members, its long semi-elliptic, shock-absorber springs, its safety gasoline tank in rear, its one-piece, banjo-type rear axle of enormous strength and ready accessibility. Check the four-wheel braking system and the independent set of emergency brakes.

3 **Engine** Look beneath the stylish hood of the "Bigger and Better" Chevrolet. See that sturdy, valve-in-head engine (the most powerful type of automobile engine yet designed), fully enclosed and protected. Note the AC Oil Filter, the AC Air Cleaner, Crankcase Breather System, Oil Pump. Notice the new alloy "invar-strut" pistons . . . the new hydro-laminated camshaft gears . . . the high grade electrical equipment.

The G.M.A.C. . . . General Motors' own deferred payment plan affords the most convenient and economical way of buying your Chevrolet on time.

FOR THE SKIN!

WORLD HAPPENINGS BRIEFLY TOLD

Henry James Cambie, pioneer railway builder and explorer, died at his home in Vancouver, at the age of ninety-one, after a brief illness with pneumonia.

Coal production in Canada during March was slightly less than in February. Alberta produced 616,063 tons. British Columbia's output was 251,832 tons.

Capt. George H. Wilkins, scarcely landed from his great feat of flying across the top of the world by aeroplane, already is planning a new air venture—this time over the Antarctic at the other end of the world.

The government is of the opinion that women should have the right to sit in the Senate and means will be devised to amend the British North America Act to permit appointment of women to the upper chamber.

The resignation of Sir Henry Drayton as member for West York was announced in the House of Commons. He has accepted the appointment of chairman of the Ontario Liquor Board.

A notice of motion for the tabling of correspondence between Canada and Great Britain on the subject of titles for Canadians has been given by C. H. Cahane, Conservative, St. Lawrence-St. George. The motion also calls for a list of foreign honors and decorations conferred on Canadians since 1919.

Dr. Henry M. Tory, president of the University of Alberta since its organization, 20 years ago, is tendering his resignation, to take effect at the end of the current college year next month, in order that he may accept the permanent chairmanship of the National Council of Scientific Research, with headquarters probably at Ottawa.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Expeller.

Will Soon Banish Weeds

A new law passed by the Quebec Government makes it compulsory for every person to destroy all noxious weeds on his property whether that property is cultivated or not. The weeds must be destroyed before they go to seed, and if the owner fails to carry out this work the authorities will step in and do the job, charging the farmer with the cost of removal.

The cries of sea-birds, especially seagulls, are very valuable as fog signals. The birds cluster on the cliffs and their cries warn boatmen that they are near the land.

Short of Breath Dizzy, Sinking Spells COULDN'T WALK FAR

Mrs. L. A. Oliver, Granville Ferry, N.B., writes:—"A few years ago I had dizzy, sinking spells so bad I could hardly stand up without taking hold of something to support me, and I could not walk any distance on account of being so short of breath."

"I had taken a lot of doctor's medicine, but it did me no good, only for the time being, so reading in the B.B.B. almanac about

I decided to try them and found them to be just what they are recommended to be, and I feel that I owe my life to them."

Financing Is a Specialty

When Contemplating Investments

Wise People Consult a Banker

News items about agents of phony stock being sent to jail and about others who escape the law, are not infrequent today, and it makes sorrowful reading, for the reason that so many of their victims are people who have entrusted their hard-earned savings to these agents or promoters. Yet there are many worthwhile concerns in which one may invest with safety. How can the good be distinguished from the bad? Very often they can't be. But those who have money to invest can be sure of their ground if they will consult their bankers or some other reputable financier.

When you're sick you consult a doctor; when you need the law, you see a lawyer. Financing is a specialty about as intricate as medicine or law. Therefore see your banker before you loosen your purse strings.

Winnipeg Newspaper Union

A Graceful Afternoon Or Evening Frock

Exceedingly graceful is the frock pictured here. The two-piece pointed skirt is gathered to a bodice having the lower edge slightly rounded, thereby giving a graceful line. The attractive arrangement of the surplice effect is effectively shown, and there are lace shields at the front and back. The long pointed sleeves may be omitted for evening wear, if desired, thereby making this frock suitable for many occasions. An added note of contrast is introduced in the flowers placed at the shoulder and hip closing. No. 1501 is for misses and small women, and is in sizes 16, 18 and 20 years. Size 18 (36 bust) requires 3½ yards 39-inch material, or 2½ yards 54-inch, and ¾ yard all-over lace for the shields. Price 25 cents the pattern.

Many styles of smart apparel may be found in our Fashion Book. Our designers originate their patterns in the heart of the style centres, and their creations are those of tested popularity, brought within the means of the average woman. Price of the book 10 cents the copy.

Small Town Papers

FRANK PARKER STOCKBRIDGE

Reprinted by special permission from Saturday Evening Post Copyright 1928, by the Curtis Publishing Company, Philadelphia.

(Continued.)

"The total circulation of these 11,500 country weeklies is about 9,500,000, an average of a little under 1,000 copies each. That doesn't sound like much to a New Yorker, accustomed to circulation figures in the hundreds of thousands. But there are only about 600 dailies in the United States which have as many as 10,000 circulation, and the whole list of dailies circulates only about 33,000,000.

"It doesn't take a large circulation to make a country weekly profitable. Bert Mills and some of the rest of you chaps here are the magnates of the business. Remember that an income, net, of \$3,000 a year in a village of 500 population is a whole lot of money; it's the equal of at least \$10,000 a year in Chicago or New York, in what it will enable a man to do for himself and his family. It's a whole lot more than the average man in the same sized town makes; as much, I should say, as anybody else in town is likely to make, including the banker and the general merchant. And I don't think I'm far wrong when I put \$3,000 a year as pretty nearly the minimum net profit for country weeklies, with the average closer to \$5,000. If I'm wrong somebody correct me."

Sounds all right to me," said an Iowa editor who had been doing nothing but listen. "I personally know at least fifteen country publishers in Iowa who make more than \$5,000 a year from their papers. It's a poor paper—or, rather, a poor editor, who can't earn 20 per cent a year on his investment in this business, and I guess our average plant investment runs nearer \$20,000 than it does \$15,000."

"That will come pretty close to it," said one of the others, who turned out to be the representative of a concern carrying a general line of printing-office machinery. "Take the main items and check me up. First is the typesetting machine, a line caster just like the big city papers use. Mighty few country papers haven't got one machine, many have two; the average is about one and a quarter. Three thousand dollars is cheap for a typesetting machine; the \$4,000 ones are more in demand. So put it at \$4,000 per paper as the average of that item."

"Then there's the press. There may be, somewhere in the United States, a newspaper still being produced on a hand press, but I don't know where it is. If I did I'd hunt up the editor and sell him a power press. The old-time country paper could be, and often was, printed a page at a time on an Army press that cost \$50. More of them used the Washington hand press, invented by Ben Franklin, which cost \$300 to \$500 and printed two or four pages at a time. Then the cylinder press came in, with a boy to turn the crank while another fed the sheets, or a little steam engine to turn the press over. But all those are obsolete now. The two-revolution press is the minimum, and from that up to the flat-bed perfecting press, printing from the roll. These types of presses cost from \$2,500 to \$20,000; I think a fair average here is another \$5,000."

"There we have \$9,000 in only the two main items of the plant. But we've got to put in hand type and cases for the ads, imposing stones, chases, a folder, a motor for the press and another for the machine, and all the rest of the necessary equipment including stereotyping machinery in many instances. Certainly there's another \$4,000 there. That makes an average investment of \$13,000 exclusive of building. More country publishers own their buildings than rent, and \$2,500 is surely not too high for an average figure of the value of the building, counting in those who don't own their own."

"Yes, I agree with our friend from Iowa that the average investment in country weeklies runs well above \$15,000, and it is increasing all the time."

The advertising-agency man had been teetering on the edge of his chair, eager to pick up the conversation again.

"Let me give you some more figures," he insisted. "You're wondering where the country editors get the money to invest in their plants, and where their profits come from. Here are some government statistics: There are nearly 60,000,000 people—more than half the population of the United States—who live in these small towns or in the country around them. There are still 27,000,000 on the farms, although 500,000 farmer families have moved to town since June, 1926. But where did they move to? To the big cities? Don't think it; they moved to the small towns, where they are still readers of the country weeklies."

"And these 60,000,000 people, instead of being the poorest part of our population, are pretty nearly the richest, on the average. There aren't many millionaires among them, but they'll average a higher cash income per family than the big cities average. Here's a survey of Edgar County, Illinois, which shows an average cash income per family of \$2,500 a year, in addition to the rent for most of them and a large part of their food

supply for many of them. That's a big income when you consider how small the living expenses are in rural communities.

"Here's another survey, made by the General Federation of Women's Clubs in July, 1927, of towns under 5,000 population—the exact territory we are talking about. It shows that in these towns there are 127,885 families owning phonographs, 104,410 with pianos, and 68,400 with radio sets.

"Here are some more government figures, from the Department of Agriculture: The farmers of the United States—those 27,000,000 men, women and children—spend \$3,000,000,000 every year for manufactured goods; they earn one-sixth of the national income, own one-fifth of the national wealth and pay one-fifth of the cost of running the national and state governments.

"They buy everything. The National Automobile Chamber of Commerce reports that they buy the majority of all motor-trucks, more than 60 per cent, of all automobiles and, naturally, nearly all the tractors. A survey by the electric-appliance industries of 750 small towns showed that 85 per cent. of the homes were wired for electricity. That's a higher proportion than in some good-sized cities. The people who live in these towns and in the nearby farm-houses which also have electric current are customers for every sort of electric equipment.

"Those are the folk who make the modern country newspaper possible and profitable."

SUNDAY SCHOOL LESSON

MAY 6

GREATNESS THROUGH SERVICE

Golden Text: "The Son of Man also came not to be ministered unto, but to minister, and to give His life a ransom for many."—Mark 10:45.

Lesson: Mark 9:33-50; 10:35-45.

Devotional Reading: Isaiah 42:1-7.

Explanations and Comments

The Request For Preferment, verses 33-37.—James and John the sons of Zebedee, came to Jesus with a special request. Matthew says that their mother came with the request (Matthew 20:20). "The case is in accordance with the law maxim 'He who does anything through another, does it himself'."—John A. Broadus. An Australian writer suggests that Mark was more chivalrous than Matthew, or else that Matthew wished to save the face of James and John, and adds, "Anyhow, it was clearly a family affair, with almost a suggestion of an Eastern intrigue. Salome may have been put up to it by her sons."

"We would that Thou shouldst do for us whatsoever we shall ask of Thee," they began. They would have Him, as it were, give them a signed check leaving them to fill in the amount as they pleased.

How like many—shall I say most?—of our petitions! We come to God to get what we want, not to learn what He wants us to have or wants from us. As Bishop Temple says, the form of all pagan prayer is, "Will you do for me what I want?" While the form of Christian prayer is, "Will you do with me and with all men what You want?"

To Jesus' question as to what they wished, they replied: "Grant unto us that we may sit, one on Thy right hand, and one on Thy left hand, in Thy glory." The two disciples were at least honest in their request; they wanted precedence and asked for it in plain words. They do not include Peter in their request for the chief places; were they jealous of him, and were they seeking to "get ahead" of him? The right and the left hand were the places of honor. Dummelow quotes a saying of Rabbi Acha to the effect that the Holy and Blessed God will cause King Messiah to sit at His right hand, and Abraham at His left. "Rank in itself is one of the false gods which it is the business of religion and philosophy to dethrone. Outward rank deserves outward respect, genuine respect is only accorded to real usefulness."—Donald Hankey.

Corns cripple the feet and make walking a torture, yet sure relief in the shape of Holloway's Corn Remover is within reach of all.

The Acid Test

"Put up notices that no book agents are to be admitted to the building," said the publisher.

"But you have just advertised for agents to sell our new work," protested the secretary.

"Of course, I want to try the applicants out. If a man could be stopped by a little thing like that notice, what good would he be to us?"

Gilbert: "Horace is very religious, isn't he?"

Morgan: "I should say he is. Why, he even wears a herringbone suit on Friday!"

Fred: Do you think women can stand more suffering than men?

Jack: Well, I can hardly imagine a man wearing chiffon stockings in winter.

Treat Colds 2 Ways

With One Treatment
RUBBED on throat and chest, Vicks

does two things at once:

(1) It is vaporized by the body heat and inhaled direct to the inflamed air passages, and
(2) It stimulates the skin like an old-fashioned poultice and "draws out" the soreness.

VICKS
VAPORUB
OVER 15 MILLION JARS USED YEARLY

An Interesting Edition

London Daily Mail Pictures Events In Year 2,000

A newspaper as newspaper men thought it would be on January 1, 2000, has been published in London by the Daily Mail.

"Air fire squad section 28 flies to a fire in Regent street and quickly quenches a blaze with its 'Anti-Fireo' extinguishers.

"The big murder of the day is that of a man killed by mental suggestion from his enemy.

"So greatly, in fact, has the mental power of the race increased that school children play games during the day and through a silent battery of 'memory impressors' do their studying in their sleep.

"Television is a routine part of the day's affairs. A crowd gathers in Trafalgar Square to watch a cricket match between the English and Australian teams playing each other at Sydney, on the other side of the world.

"Captain Ralph Girdlestone's 24-hour flight around the world is featured particularly because a noonday sun was shining over him all during the flight. People have to wear 'crash-proof lingerie' because flying is a part of their ordinary daily life.

"The only thing that seems unchanged is the civil war in China, which is still in the news."

The newspaper—a full-sized one of 24 pages—was published with a Daily Mail exhibition of "Homes of the Future," at the Great Olympia.

The difference between an alarm clock and a hen is that when you set a hen she sits there, but when you set an alarm clock it goes off.

Cute in a Baby— Awful at Three —and it's Dangerous

by Ruth Brittain

Much of the nervousness in older children can be traced to the overstimulation during infancy, caused by regarding baby as a sort of animated toy for the amusement of parents, relatives and friends. Baby may be played with, but not for more than a quarter of an hour to an hour daily. Beyond that, being handled, tickled, caused to laugh or even scream, will sometimes result in vomiting, and invariably causes irritability, crying or sleeplessness.

Fretfulness, crying and sleeplessness from this cause can easily be avoided by treating baby with more consideration, but when you just can't see what is making baby restless or upset, better give him a few drops of pure, harmless Castoria. It's amazing to see how quickly it calms baby's nerves and soothes him to sleep; yet it contains no drugs or opiates. It is purely vegetable—the recipe is on the wrapper. Leading physicians prescribe it for colic, cholera, diarrhea, constipation, gas on stomach and bowels, feverishness, loss of sleep and all other "upsets" of babyhood. Over 25 million bottles used a year shows its overwhelming popularity.

With each bottle of Castoria, you get a book on Motherhood, worth its weight in gold. Look for Chas. H. Fletcher's signature on the package so you'll get genuine Castoria. There are many imitations.

BEATTY STRESSES CANADA'S NEED OF POPULATION

Ottawa.—More executive efficiency and greater administrative latitude under experienced executives commanding high salaries were among the suggestions offered by E. W. Beatty, president of the Canadian Pacific railway.

Mr. Beatty indicated his belief that the present efforts being made by the government and the railways were bringing inadequate results. He approved of the training in Great Britain as a method of eliminating "misfits" from immigrants.

Millions of Canada's 9,500,000 people were of British and French origin, he said.

"This would indicate that we have not yet reached the point at which the admission of continentals, even in considerable numbers, should cause apprehension," said Mr. Beatty.

"We are all, I think," said Mr. Beatty, "impressed with the fact that Canada has made substantial progress in the last few years but we think progress can be expedited and even greater prosperity follow the admission of more people to this country. I share the views of the president of the National Railways and I agree with others that our ambition should be to admit, first from Great Britain and afterward from the United States and selected continental countries, men who are physically fit, and able, and willing to follow agricultural pursuits.

"If the figures for the past three years are approximately correct that 80,000 per year was the net increase in our population, other than from natural increase, and the extent of the country and its resources are considered, it cannot, I think, be said we are admitting an adequate number of new settlers. I feel, too, that with present condition of things the fundamental principles underlying the legislation are correct and that immigration as applied to Canada relates almost exclusively to land settlement and colonization. The entrance of men who followed other pursuits will depend upon the opportunities for employment existing in Canada and when these opportunities are known to exist they will be secured without difficulty and without effort. In fact, the history of the U.S. has indicated that where jobs are available applicants are usually found for them in great numbers.

"If I am correct in assuming that the question is one of land settlement and colonization, our efforts must be of necessity largely restricted to obtaining settlers or those who can in time become settlers. We have a great deal of unoccupied land in Canada.

Socialist Leader Has World Peace Scheme

Would Confiscate Half Gold Reserve Of Nations Declaring War

Paris.—While Foreign Minister Aristide Briand and Secretary of State Frank B. Kellogg are getting on slowly in their proposals for outlawing war, Dr. Weill, Socialist leader in Paris, hatched a powerful idea for putting old man Mars out of business.

Dr. Weill says in a proposal made public:

"Let every power that is a member of the league of nations deposit half of its gold reserve at Geneva, agreeing that it will be confiscated the moment it declares war, and I guarantee shooting irons will go right out of fashion."

San Francisco, Calif.—The thirty-three-year-old "Star of Alaska," a single rigged sailing ship, won a race from San Francisco to Alaska, from the barque "Star of England." It was learned here. The owners had offered a \$100 purse to the crew of the winning ship.

Mexico City.—Newspaper despatches from Tuxtla, Gutierrez, state that Catholic priests and nine nuns were arrested at San Cristobal, state of Chiapas, charged with conducting religious services without having first complied with the law of registration.

W. N. U. 1731

Gave Life To Aid Bremen

Floyd Bennett Dies In Quebec Hospital From Double Pneumonia

Quebec.—Floyd Bennett, one of the world's best known aviators, died in hospital here, following a severe attack of double pneumonia.

Bennett, who, in conjunction with Bernt Balchen, was one of the first to try to bring tangible aid to the stranded German and Irish trans-Atlantic fliers at Greenly Island, contracted his illness as a direct result of his attempt to help his stranded fellow airmen whose plane, the Bremen, was in a disabled condition at out-of-the-way Greenly Island.

Bennett had been suffering from a heavy cold prior to his take-off from Detroit and had undertaken the flight against advice of physicians.

His wife and Commander Byrd, both of whom rushed here from New York when informed as to Bennett's serious condition, were at his bedside when he died. Mrs. Bennett herself was ill when she arrived here and was occupying a cot in the hospital, suffering from tonsillitis.

Pleased With Senate Prospects

Janey Canuck Sees Results Of Twelve Year Campaign

Edmonton, Alta.—Announcement from Ottawa, that the Dominion Parliament would take steps to amend provisions of the British North America Act so that it would be legal for women to receive appointments to the Senate, brings to a climax a 12-year campaign to achieve this objective instituted and waged with unerring vigor by Mrs. Emily Murphy, first woman to be appointed police magistrate in Canada, and who, under the pen name of Janey Canuck, has contributed much literature to the cause of woman's advancement in the social and political life of the country.

Asked regarding the statement on the subject made in Parliament, by Hon. Ernest Lapointe, Minister of Justice, Mrs. Murphy expressed her heartiest appreciation of the Government's action, and said it was one with which the people of Canada, for the most part, were in perfect harmony, irrespective of "class, creed, party or sex."

Russian Whites Lose Leader

General Wrangel, Enemy Of Bolsheviks, Dies At Brussels

Brussels, Belgium.—Baron Peter Wrangel, the last hope of the Russian Whites, whose army the Bolsheviks chased into the Black Sea seven years ago, is dead.

The end came in the little suburban home to which he retired in 1926, leaving the last remnants of his command, a few Caucasians and Don Cossacks, in Jugo-Slavia. He suffered from intestinal trouble which affected his heart and lungs.

General Wrangel was born at St. Petersburg, now Leningrad, August 15, 1878. He was a member of a remarkable family which traced its origin to the nobility of the Balkan states as far back as 1200.

Must Exercise More Care

Charge Dry Officers At Border Cities Careless With Guns

Ottawa.—Canada will communicate immediately with her minister in Washington, Hon. Vincent Massey, in respect to the endangering of lives of Canadian citizens from bullets believed to have been fired by American preventive officers operating under the Volstead Act, stated Premier King in the House.

Mr. Massey will ask that more care be exercised by these U.S. officials.

According to S. F. Robinson, Conservative, Essex West, several times within the last month Canadians have been nearly killed by bullets from American preventive officers at the border cities of Windsor, Walkerville, and Sandwich.

Plan Regular Atlantic Flights

Berlin, Germany.—Nineteen Lufthansa company pilots have been trained as ocean navigators and a group of nine to eleven ton airplanes is being constructed ready for regular trans-Atlantic flight service, probably to South America it was announced recently.

CANADIAN GIRL AVIATOR

Miss Caroline Sykes, of Toronto, the first Canadian girl to make a parachute jump from an aeroplane, is the only Canadian girl attending the all-American aircraft convention in Detroit. She predicts a bright future for aviation in Canada and is anxious to become an air mail pilot.

Increase In Immigration

More Britishers Arrive and Canadians Returning From U.S.

Ottawa.—In the fiscal year ended March 31, 1928, immigration to Canada amounted to 151,537, an increase of 5 per cent. over the previous year, when it totalled 143,991. These figures were made public by the department of immigration and colonization.

During the last 12 months, as compared with the preceding year, there has been an increase in British immigration of 1,088. Immigration from the United States has increased by 3,982, and from other countries the increase has been 2,536.

A significant feature of the statistics is the increase in immigration from the United States, which was greater than the increase from all other sources combined.

During March the total immigration to Canada was 11,685, of which 3,150 were British, 2,383 from the United States, and 9,132 from other countries.

During March 2,670 Canadians who had gone to the United States to reside returned to Canada, declaring their intention of remaining permanently in this country. The number of such returning Canadians in the fiscal year was 39,887.

Norwegians Aid Canada's Development

1. A group of Norwegians photographed after having spent a few years in Canada.
2. Young girl dressed in the costume typical of her native country.

By introducing into Canada such winter sport talent as that of the Nelson brothers in ski-jumping, and others in figure skating, Norwegians have won much favor and esteem in the eyes of Canadians.

Nels Nelsen, C.P.R. brakeman created a world's record in 1925 at Revelstoke, B.C., in making a successful leap down the mountain side of 240 feet, a distance that has not yet been surpassed. His brother, Iyind Nelsen, created the record for the Quebec jump this winter in making 114 feet, a highly creditable performance on that particular jump.

At Banff and Quebec and other winter sport centres in Canada, Norwegians, as amateurs and professionals, have contributed much to native figure skating talent. They have undoubtedly shared in the training of the outstanding Canadian skaters, many of whom have won great distinction in international and world competitions.

Out of Canada's population of 9,500,000 roughly 69,000 are of Norwegian origin. The annual average influx of immigrants from Norwegian ports is 5,000, the majority travelling by Canadian Pacific ships to Quebec and Montreal in the summer, and St. John, N.B., in the winter. These vessels are splendidly equipped for this purpose and carry as many as 900 immigrant passengers at a time, considerably exceeding the capacity of other lines.

Automobile Racer Killed

Car Overtakes When Lockhart Was Seeking New Record

Daytona Beach, Fla.—Frank Lockhart, noted automobile racer, was killed almost instantly here when he lost control of his machine while racing down the beach at more than 200 miles an hour.

On his first run, Lockhart had been clocked at 147 miles an hour. The return trip was made at a speed of 193 miles. Starting South on the beach again the machine's speed was timed at 208.45 miles.

In the final trip, it was apparent that he was making more than 200 miles an hour when the racer went out of control, about 500 yards south of the beginning of the mile stretch directly in front of the grandstand.

Lockhart's machine was demolished. The car in which the famous speed king met his death was the one in which he plunged into the ocean here on February 22 last, while making an attempt to set a world's record during the annual speed trials here.

Commissioner Of Lands Dead

John W. Greenway Was Son Of Premier Of Manitoba

Ottawa.—John W. Greenway, aged 67 years, commissioner of lands, Department of Interior, and son of the late Hon. Thomas Greenway, former premier of Manitoba, died here.

He had been in ill health since the death of his wife, March 4 last.

Under Mr. Greenway's supervision some thousands of settlers took up land in the West and he was largely responsible for the success of the various plans used in providing homesteads for these settlers.

Mr. Greenway was born at Berville, Ont., at the time his father was Federal member for Huron.

The family moved to Manitoba in 1879 and after his father became premier of that province most of the management of their farm at Crystal City fell on the shoulders of the son. In 1898 John Greenway was appointed inspector of School Lands in Manitoba and became commissioner of lands under the Dominion Government in 1904.

Killed By Chinese Soldier

Shanghai.—Dr. Walter F. Seymour, superintendent of the Presbyterian board of foreign missions hospital at Tsinan, southwest of Shanghai, was shot to death by a Chinese soldier. Dr. Seymour, a graduate of Wisconsin University and Northwestern Medical School, Evanston, Ill., came to China in 1893.

BRITAIN NAMES SIR WM. CLARK OTTAWA ENVOY

London.—Sir William Henry Clark, comptroller-general of the department of overseas trade since 1917, has been appointed British high commissioner to Ottawa.

Sir William Clark is the eldest son of the late W. J. Clark, Serapea House, Cambridge, and is in his 53rd year.

Sir William was educated at Eton and Trinity College, Cambridge. He has had an exceptional training in the public service. He was a clerk in the Board of Trade Department of the government in 1889; secretary to the special mission to Shanghai to negotiate a commercial treaty with China in 1901; acting second secretary in the diplomatic service in 1902; secretary to the Royal Commission on the House supply of food, etc., in time of war, 1903-5.

Sir William was private secretary at the Board of Trade to Lloyd George in 1906, and to Winston Churchill in 1908; secretary to Lloyd George as chancellor of the exchequer, 1908-10; member for commerce and industry of the council of the Viceroy of India, 1910-15, and comptroller-general of the commercial intelligence department of the Board of Trade, 1916-17.

As soon as the necessary arrangements are completed, Sir William will proceed to Ottawa.

Germans Planning New Trip Across Atlantic

Completing Plans For Another Flight To North America

Deseau, Germany.—Negotiations for another flight to North America in a Junkers plane by way of Ealdonnel, Ireland, have almost been completed.

The Junkers officials, however, have declined to divulge the details, but the latest Associated Press learns that the project is being engineered by Lilli Dillenz Viennese actress who last year got as far as the Azores in the D-1230 in an effort to make the Westward passage.

The Europa, sister plane of the Bremen, which last year was compelled to land after a valiant effort to start for the U.S., will be used and, will be piloted by Johann Ristiez, who was aboard the Europa on her unsuccessful attempt.

It is understood that Fraulien Dillenz owns the Europa and that she will be a passenger on the new attempt.

Profits From Liquor Sales

Annual Report For Saskatchewan Shows Increase Over Last Year

Regina.—Profits from the sale of liquor in Saskatchewan in the year ended March 31 last, were \$2,443,800.68, it was officially announced on receipt of the annual report of the independent firm of auditors.

In the corresponding period one year earlier, the profits were \$2,114,866.44.

In the last 12-month period revenue from the sale of beer exceeded that from the sale of wines and liquors. Beer sales totalled \$6,171,092.28, while wine and spirits sales totalled \$5,534,442.32.

Proceeds Go To Nurse

New York.—The proceeds of a matinee under the auspices of Sir Wilfred Grenfell in a play house here, will go to Miss Great Ferris, of Saint John, N.B., who carried supplies to the Bremen fliers on Greenly Island, and afterwards through the Saint John Telegraph-Journal and the Canadian Press, gave the first detailed first-hand account of their plight to the world. Miss Ferris is a nurse at the Fortsea Mission in Labrador.

Willing To Pay Part

Ottawa.—The Government is favorably disposed toward payment, in part at least, of amounts which may be due Home Bank depositors who have not received 35 per cent. of their claims under legislation enacted two sessions ago. This was the statement made in the House by Hon. J. A. Robb, Minister of Finance, in reply to a question by G. R. Geary, Conservative, Toronto, South.

Hardy Norse Explorers Make Trip To Barren Lands On The Coppermine River

Waking the echoing silences disturbed only at long intervals by white men over the centuries, two young Norwegians—Hjalmar Nelson-Dale and Helge Ingstad—are today, if all has gone well with them, beating their dangerous way back across the barren lands from the headwaters of the Coppermine River.

Only twice in the last 160 years, so far as is known, have white men penetrated to the source of the river in the mysterious hinterland through which the Coppermine River flows.

Its discovery was made in 1772 by Samuel Hearne, following an earlier attempt in 1769, when the desertion of his Indians compelled abandonment of the effort.

Hearne's successful expedition of 1770-1772 was marked by the massacre which he was unable to prevent of a peaceful Eskimo tribe by his own Indians, and history has marked that fateful spot on the map of the Northland with the name of "Bloody Falls," the slaughter occurring close by some falls on the Coppermine River.

Then in 1821 came the thrilling and ill-fated Franklin expedition, which traversed 5,550 miles out and back across the barren lands from Hudson Bay, to leave the bones of many of its members lying in the inhospitable earth over which the survivors dragged their weary way.

Another 100 years almost elapsed until, in 1921, G. H. Blanchet, of Ottawa, made his brilliant dash into the

unknown to discover the outflow of water through a rock wall of an elevated lake from whence, looking northward toward the Arctic, the peaceful Coppermine meandered slowly through a broad plain dotted with herds of caribou, to the shores of the Northern Sea.

It was in the summer of 1927 that the two young Norwegians—Nelson Dale was born in Canada, and so is Norse-Canadian—left Edmonton for Fort Resolution, there to start out on the first leg of their hazardous journey.

In July, 1927, they wrote to O. C. Boness, Edmonton lawyer, that they were leaving Resolution—last outpost of civilization—in a few days and that if all went well they hoped to reach the Coppermine river in the fall of that year, spending a year in the "terra incognita," and returning to civilization by dog train.

The fall of 1928 should see the two adventurers safely back provided they have met with no mishap.

Ingstad is a qualified attorney-at-law in Norway and for some time was correspondent for "Tidens Tegn," the largest newspaper in that country.

His partner has hunted and trapped in the north for some years and went north with Ingstad after a trip home to Norway in 1926-27.

Neither adventurer apparently was aware before he left that Mr. Blanchet had preceded them by three years in their attempt to reach the Coppermine river head waters.

DUCHESS OF YORK

The Duchess of York recently opened the new half-million dollar home for nurses at the Kingston and District Hospital, Kingston Hill, England. She was photographed while strolling through the grounds after the ceremony.

Personality Can Be Changed

Roosevelt Was Example Of What Person Can Do

Personality is a strange thing. Sometimes I think we are born with one special kind just as we are born with a certain nose and with hands whose finger prints are unlike any other in the world, and which can't be changed. But, on the other hand, if Theodore Roosevelt had allowed the personality he was born with to rule him, he would have gone through life a despondent anaemic individual with a spirit weighed down by the despair of tuberculosis. But he pulled himself up and out of it. Sometimes I think anybody can do the same thing. And sometimes I think that selfishness is harder to cure even than a physical disease.

Canadian "Moth" Planes Are Helping To Combat Spread Of Wheat Rust In West

How Canadian "Moth" planes are helping to fight wheat rust in the West is told in a statement made public by the Department of Agriculture, as follows:

"It would be almost impossible to imagine two more widely separated things than an aeroplane and the rust which attacks our wheat. Yet we find the Royal Canadian Air Force co-operating with the Department of Agriculture through the Dominion plant pathological laboratory at the Manitoba Agricultural College, Winnipeg, in the great work being done by Drs. D. L. Bailey and C. H. Gouken in studying and formulating a plan of control for one of Canada's worst and most costly enemies.

"The aeroplane has been extensively used for the purpose of locating diseased conditions in our forests, and also in dusting from the air for the control of the spruce budworm. The work differs considerably, however, in connection with wheat rust and consists mainly in the exposure of slides at different altitudes and in different locations. These aeroplane exposures attempt to collect from altitudes of from one to five thousand feet the date of the earliest appearance of rust spores, the region over which they first appear, the rate at which the spore content of the air increases over various regions, the visibility of spores caught at these higher altitudes, and the relation of certain environmental and climatic factors to the rate of development and spread of rust.

"The air force stations at Lac du Bonnet, Norway House, Cormorant Lake, and High River, have assisted in this work. Each station is supplied with tightly stoppered bottles containing wooden paddles to which are attached microscope slides lightly smeared with vaseline. These slides are exposed for 13 minutes of varying altitudes, the slides replaced in the bottles and then returned to the Government laboratory at Winnipeg.

"In one instance at Lac du Bonnet a surprisingly high number of spores was caught on a slide, which seemed to indicate the plane at an altitude of 5,000 feet had travelled through a pocket or eddy of air where the concentration of rust spores was very dense. Where the spores originated is speculative, but the fact that at the time the spores were being caught at Morden, where there was a heavy local outbreak of rust seems to point to that district as the originating point. When the patchy nature of these outbreaks is considered, one is led to suspect that there may be some relation between these clouds or eddies of spores and localized heavy field infections. One can well imagine a rain washing down these spores on a more limited area, where they would germinate and produce a heavy infection.

"The Department of Agriculture has proved on several occasions the efficiency of the aeroplane in many lines of investigation, and the day may not be far distant when "Moths" will be common in our agricultural communities."

BRITISH NAVY PROMOTIONS

At the youthful age of 42, Capt. Gordon Campbell (V.C.), has just been made rear-admiral in the British Navy. Vice-Admiral Sir Frederick Field (centre), has been promoted admiral, and Admiral Freemantle has been placed on the retired list at his own request in recent navy changes.

Build Mammoth Grain Elevator

New Wheat Pool Elevator At Fort William Will Be Most Modern For the Continent

The board of directors of the Saskatchewan Wheat Producers, Limited, has awarded the contract for the erection of the super-structure of Pool Terminal No. 7, Fort Arthur, to the Barnett McQueen Construction Company, Fort William, Ont.

This new terminal elevator, which is being built by the Saskatchewan Wheat Pool, will be the most modern and the fastest terminal grain elevator on the North American continent, according to C. D. Howe, of C. D. Howe & Co., consulting engineers, Fort Arthur. It will have two storages of 3,000,000 bushels each, in addition to a work house with a capacity of 200,000 bushels, and it will be able to take delivery of 300 cars of grain in ten hours, or 500 cars per day during the rush season. It will have a shipping capacity of 150,000 bushels per hour, and a drying capacity of 1,000 bushels per hour.

Waiter, I am going to die. Bring me a beer!"
"Yes, sir. Light or dark?" Moustique, Charitrol

Film Wild Game Life In Alberta

Noted Hunter Will Spend Summer Months In Mountains Of Jasper Park

The moving picture camera, and not the death spinning rifle, is the weapon of Major A. R. Dugmore, well known wild animal photographer of England, who has reached New York, after an extensive expedition through the wilds of Africa, during the course of which he recorded on film the habits of animals ranging from the nimble and elusive gazelle to the ponderous and dery rhinoceros.

To round off his experience of game photography on four continents, Major Dugmore is considering spending the coming summer on a two or three months' journey by pack horse through the mountains of Jasper Park, Alberta, where he will be able to "shoot" Rocky Mountain sheep, goat, caribou and bear.

Major Dugmore will probably commence his journey from Berg Lake, at the foot of Mount Robson, 12,972, the highest peak in the Canadian Rockies. With him will be his wife and daughter, "Bams" Dugmore. The latter is as keen a camera enthusiast as her father. Since she has been fourteen she has been with him on his quest of game photography.

Major Dugmore holds no brief for the slaughter of game with firearms. The camera, he states, offers better sport, provides more effective and durable trophies and demands greater skill in stalking.

Large Area Of Forest Land

Of the total non-agricultural area of Canada about one-half can be made to produce timber crops if permanently dedicated, protected, and managed to that end. Investigations show that the only economic use for one-third of the land area is in the growing of wood.

PRAISES CANADIAN HOSPITALITY

Baron Perenyi, Minister of the Interior for the Republic of Hungary, who visited the Hungarian settlements adjacent to the lines of the Canadian National Railways in Western Canada recently, expressed himself as much impressed by the help which Canadian-born citizens are giving newly arrived Hungarians in settling on the land and generally establishing themselves in Canada.

"Canada is a place where anyone can make an honest living with hard work," His Excellency said. "All that has been said of Canada is true. It is a land of real opportunity and I shall certainly come back again where I find so many of my countrymen happy, contented and prosperous."

The photograph shows Baron Perenyi on the left and Albert Paizs, noted Budapest editor on the right. Mr. Paizs visited Canada three years ago and published a book, "The Hungarian in Canada," which attracted many Hungarians to Canada.

German Settler Booms Canada

During Trip To Homeland Induces Thirty Young Men To Migrate To Dominion

Carl Schulz, of Uckmark, Brandenburg, Germany, who came to Canada a year ago and purchased 1,000 acres of unbroken land on the Canadian National Railways near St. Walburg, Saskatchewan, proved to be a good colonization agent for Canada. Following his purchase he returned to Germany to settle matters regarding his estate there and while in his homeland he talked the gospel of Canadian opportunity. The result was that when he returned to Winnipeg recently he brought with him thirty promising young men and more than one hundred are following as soon as they can dispose of their interests overseas. The twenty will work with Mr. Schulz until they are able to take up land of their own.

Mr. Schulz says that a very heavy immigration to Canada from Germany can be looked for, starting next year. Thousands of young Germans are turning their eyes towards Canada and will come as soon as they can dispose of their holdings in Germany.

"This is intolerable. I have found a button in the soup."
"Lucky man. The management gives a class of brandy to whoever discovers a button in the soup."
Buen Humor, Madrid

DON'T suffer headaches, or any of those pains a tablet of Aspirin can end in a hurry! Physicians prescribe it, and approve its free use, for it does not affect the heart. Every drug-gist has it, but don't fail to ask the druggist for Bayer. And don't take any but the tablets that are stamped with the "Bayer Cross."

Aspirin is the trade mark (registered in Canada) indicating Bayer Manufacture. While it is well known that Aspirin means Bayer manufacture, to assure the public against imitations the Tablets will be stamped with their "Bayer Cross" trade mark.

CHAPTER XXIII.—Continued.

"Well, there's many a good girl has come to me before without references, Mrs. Angus. I'm no such a hand for references as I once was," said Miss Ritchie. "They are often written to get rid of a girl, you know."

"No, I do not know that," said Mrs. Angus. "I prefer references."

"Well, then, here you are," said Miss Ritchie; "here's an old country girl with letters from rectors and curates and local bodies and all—she'll do fine for you."

That morning Helmi was interviewed by four other women. She was viewed with favor by the first one, who enumerated her good points without ever thinking it might be embarrassing. "You look clean and smart," she said; "you know how to put your clothes on straight, and you look a person square in the eye. You are a foreigner, I see. From what country?"

"Finland," said Helmi.

"Goodnight!" cried the lady, with a harsh laugh; "then it's all off. My husband had one in his bridge gang and, a positive nuisance he was, a socialist and agitator. He would put me out if I brought home a Finn. I want a British subject, Miss Ritchie. We owe it to our own to give them the choice, though, dear me, some of the English girls have been a trial, too."

The next woman who talked to Helmi kept a boardinghouse, and fancied Helmi on account of her height. "I like a tall girl—she can carry trays better. You've done it?—that's good. Yes, you are a likely looking girl, I must say foreign, but still you have good English. I don't mind Finns—they're tempery, but clean and smart. What's that? You want to go home at night! Why? A Baby? Nothing doing—you won't do me at all. No, sir,

If You Need A Tonic Get The Best!

Guelph, Ont.—"There is nothing better as a building tonic than Dr. Pierce's Golden Medical Discovery. Several times when I was run down, suffered from weak stomach, thin and impoverished blood, I took it and always obtained good results. It enriched my blood, relieved me of the weak stomach, built me up in health, and made me feel like a new person. I also found it splendid to take following motherhood to give me strength. I always recommend Dr. Pierce's medicines to those whom I find ailing for I know them to be just as advertised."—Mrs. W. H. Skyring, 52 Nottingham St.

Write Dr. Pierce's Invalids Hotel in Buffalo, N. Y., for free advice.

W. N. U. 1731

I had a girl with a baby once and it was always getting sick or dying or something just when I needed her worst. Never again! I believe in population all right, but I can't have a waitress with a baby, even if we never get the country settled. What in the world did you have a baby for, a smart girl like you?"

Helmi stared at her haughtily. "It is not your business," she said, "I can have a baby if I want it without asking you."

"You bet you can, and welcome. Well, who else have you, Miss Ritchie?"

The fourth woman who spoke to Helmi asked her many questions about her past. "Where is your husband?" she asked.

Helmi replied that she did not know.

"Are you sure you are married?"

Helmi produced the certificate.

"Do you ever think he may have deserted you?" the woman asked searchingly.

Helmi hesitated, and as the woman piled her questions she could only think of the brace and bit Jack used to bore holes in the boards. Helmi knew she had no right to question her, but she answered as bravely as she could, all the time praying, "Make her take me, God; Make her!"

"Well, my dear, I wouldn't be too sure. Men are fickle, I know. My first husband left me."

"My man is a good one," said Helmi, firmly.

"Any family?"

"One little girl, one month old."

"Well, of course, that would be the difficulty."

"I can leave her with friends," said Helmi, eagerly. She was going panky. Was there no work anywhere for her?

"Still, I have three sons, young men; it would not be nice to have a young girl who has a baby—you know what boys are like—inclined to tease."

"I like boys, good enough," said Helmi, eagerly, "try me—I am a smart worker. I have to get work, my money is nearly gone, and I must pay for my baby's care, my friends are not rich people."

"I would not suppose they were," said the lady, with emphasis. "I suppose they are Finnish people like yourself—simply working people."

"No, ma'am," said Helmi, "it is a Canadian family who have been very good to me."

"Indeed," said Mrs. Swallow, "how good of them! I hope you are very grateful."

"I am," said Helmi. "I want to pay. Will you take me?"

"I will think about it. I do not like to decide in a hurry. My home is everything to me. I plan everything so carefully. People tell me I am foolish, but it's my nature. Give me your phone number. You haven't a phone?"

Oh, dear, how awkward! Let me see, you could phone me—No. 8333—that is easy to remember but I cannot just say when I will be in. Every day there is something. Really, I grow busier all the time, it seems, and one cannot refuse invitations when one accepts them. Friday evening at dinner time—we dine at seven—I think I have no dinner engagement."

Sadly disappointed, Helmi turned away. How could she wait until Friday—she must have work. It was now near twelve—surely someone would take her? She looked back and searched the faces of the women. Miss Ritchie nodded to her encouragingly.

"I'll phone about for you when I can," she said; "there is a rush on this morning."

Just at that moment the door opened and a dainty little lady entered. She came to the desk quickly, with tiny steps, like a mechanical toy. "Oh, Miss Ritchie, I am in such trouble," she began; "Mary has left me. She quarrelled with Robin, and wanted him to apologize. It is pretty hard for a big boy of seven to apologize, now, isn't it? He simply wouldn't. He had thrown a tomato at her—it was very naughty of him, of course—just a boyish prank—and she took it so seriously. Have you someone?"

Miss Ritchie called Helmi over. "Here's the very girl for you, Mrs. Brand," she said; "she has a baby of her own, and she'll be good to the twins, I know."

"Oh, I couldn't take a girl with a baby—it would be . . ." she hesitated.

"I can work by the day and leave the baby with friends," said Helmi. She was pale and tired now, and

If you buy Red Rose Tea in the aluminum package and you are not thoroughly satisfied, we have authorized your Grocer to return your money on receipt of the container, no matter how much of the tea you have used. Order a trial package. S-W

looked too ill to be an attractive venture for anyone looking for help.

"I am strong," said Helmi; "my baby is young, so I am pale yet. Try me—for a day even."

"Well, I must ask my husband—I always consult him of course"—(Mr. Brand would have been interested in this) "and I will let Miss Ritchie know. That will be the best. I couldn't very well let you bring the baby, and it's at night I need you most."

Helmi turned to Miss Ritchie. "I must go now," she said; "a little girl minds the baby—home from school, she stayed for me."

Miss Ritchie nodded. "Better luck next time," she said; "I shall keep you in mind."

In the afternoon Helmi came back. Mrs. Corbett was not going out, so she kept the baby. But no one wanted Helmi—she was a foreigner, and she had a baby.

Kind-hearted Miss Ritchie was distressed, and flared up in anger when one woman said to Helmi: "You should have thought of this about this time last year?"

"Having a baby is not a crime, Mrs. Coatsworth; the poor girl is honest and willing to work. She'd give service for every dollar. I'll go bail. She isn't asking charity or even sympathy."

All afternoon Helmi waited, while well-dressed women came and went. The seekers of employment sat together, and were easily distinguishable from the others. Their manner was humble and beseeching. The war with all its dislocations had thrown many women out of employment, and on the faces of many, gaunt fear was plainly written. This was particularly true of those who were the most refined and cultured.

Fragments of conversation fell around Helmi as she sat among the seekers.

Two women in seal coats were discussing the situation.

(To Be Continued.)

An Oil For All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Electric Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicines and be amongst those taken on a journey.

Position Is Reversed

U.S. Will Never Be Able To Pay Debt To Britain

Nearly as many men of the British empire passed over the Menin road to the Ypres salient not only never to return but ever to lie there without a grave, unknelt, unconfined and unknown, as the United States lost by death in the world war. And we of all the universe, have reason to stand with gratitude before that gate of honor to those who perished behind it. But for their endurance and that of their comrades, living and dead, it would not be a memorial to their sacrifice, but a monument to their defeat—a gate opening to the sea and our own coasts. And yet we continue to speak of their debt to us—their debt, who have put us and all the world in eternal debt to them.—New York Times.

Insist on Minard's Liniment—accept no other.

Piano Is Still Popular

Radio Or Mechanical Instruments Cannot Take Its Place

When the popularity of the radio began to be manifest, many persons expressed the opinion that all musical instruments would in time become obsolete, especially the piano. But the recent statement of a New York piano company that all existing records in the piano business had been broken by the sale of \$108,000 worth of pianos in one day proves the contrary. The same prediction was made when the player-piano and the phonograph made their debut, but this extraordinary one-day sale of pianos indicates otherwise.

Centennial Celebration

Henri Dunant, Founder Of Red Cross,
Winner of Nobel Peace Prize

Born Geneva May 8, 1828. Died, Paris, October 31, 1910.

Franco-Swiss business man and philanthropist. Author of several books.

Casually travelling through Northern Italy in 1859, Dunant came upon the ghastly plain of Solferino where, on June 24th, 300,000 men had been engaged in a battle which had lasted fifteen hours.

Shocked into action at the sight of 40,000 dead, wounded and dying soldiers, Dunant undertook to establish a volunteer ambulance and nursing service, recruited from the nearby town of Castiglione. With these workers, he obtained official permission to tend the wounded and dying on the field of battle, going out personally with wine, food, cigarettes, tobacco, for which he paid out of his own purse. So indefatigably did he work that, in gratitude, the invalids named him "The Good Samaritan of Castiglione."

The vision of the suffering witnessed at Solferino never left him. For three years he travelled about Europe, preaching, lecturing, writing, advocating the need of speedy reorganization of military and medical nursing service. Finally, in 1862, his little book "Un Souvenir de Solferino" appeared and startled a shocked world into the immediate need for change.

The Committee of Public Safety consequently, under the presidency and chairmanship of Gustave Moynier and General Dufour, became so interested that it succeeded in calling together an International Conference in 1863. As a result of these efforts still another conference was called in 1864, when 16 nations sent delegates. The meeting ended when 12 out of the 16 national representatives signed the first Treaty of Geneva, and Red Cross was established for the first time in international law. Today 59 nations subscribe to this Treaty, which grew out of the ideals of Henri Dunant.

Dunant lived a long and useful life, devoting a large fortune to the furtherance of his benevolent and philanthropic work.

C. N. R. Announces Low Summer Fares

Round Trip Summer Excursion Fares Go Into Effect May 15th

Summer days are bargain days on the Canadian National Railways. Commencing May 15, round trip summer excursion fares goes into effect. These fares feature a reduction of from 20 to 25 per cent as compared with the regular rates as well as allowing the traveller a longer period before the date of expiration, the low fares remaining in effect until September 30.

The new rates are applicable from Pacific and prairie province points on the Canadian National Railways to all points in the east and also from prairie province points to the Pacific Coast. On the eastern route the option of making part of the trip by boat across the Great Lakes is permitted and the same privilege is extended to those desirous of making the boat trip between Vancouver and Prince Rupert.

Given Leave To Appear

Four organizations have been given permission to appear before the committee investigating immigration. The Anglican Synod, which recently expressed criticism of the department, the Canadian Legion (Alberta command), the Welcome League and the Salvation Army were all given leave to appear.

Neuralgia succumbs to Minard's Liniment.

Little Helps For This Week

"Let us do good unto all men."—Galatians vi. 10.

The chief use, then in man of that he knows, Is his painstaking for the good of all; Not fleshly weeping for our own-made woes, Nor laughing from a melancholy gall; Not hating from a soul that overflows With bitterness breathed out from inward thrall; But sweetly, rather, to ease, to loose, or bind, As need requires, this frail, fallen human kind.—Fulke Greville.

Power to do good is the true and lawful end of aspiring. For good thoughts, though God accept them, yet towards men they are little better than good dreams, except they be put in act, and that cannot be without power and place as the vantage ground.—Lord Bacon.

NO MEDICINE LIKE BABY'S OWN TABLETS

For Either the Newborn Babe Or the Growing Child

There is no other medicine to equal Baby's Own Tablets for little ones—whether it be for the new born babe or the growing child the Tablets always do good. They are absolutely free from opiates or other harmful drugs and the mother can always feel safe in using them.

Concerning the Tablets, Mrs. John Armour, R.R. 1, South Monaghan, Ont., says:—"We have three fine, healthy children, to whom, when a medicine is needed, we have given only Baby's Own Tablets. The Tablets are the best medicine you can keep in any home where there are young children."

Baby's Own Tablets are a mild but thorough laxative which regulate the stomach and bowels; banish constipation and indigestion; break up colds and simple fever and make teething easy. They are sold by medicine dealers or direct by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Greater Part Submerged

Icebergs float so that almost nine times their visible bulk is submerged. In Baffin Bay Sir John Ross saw icebergs aground in 1,500 feet of water, Antarctic icebergs, though rarely over two hundred feet in height, are often vast plateaux, table-topped, that have been known to reach thirty miles in length.

A Real Asthma Relief. Dr. J. D. Kellogg's Asthma Remedy has never been advertised by extravagant statements. Its claims are conservative indeed, when judged by the benefits which it performs. Expect real relief and permanent benefits when you buy this remedy and you will not have cause for disappointment. It gives permanent relief in many cases where other so called remedies have utterly failed.

A holy war is reported to be raging in Arabia and parts adjacent. As we understand it, a holy war is about as holy as a civil war is civil.

Toothache

Fill cavity with cotton soaked in Minard's. Also bathe the face. Quick and sure relief.

Notice is hereby given that all
persons having claims on the Estate
of the said Mary Hempseed, who
died on the 2nd day of April, A.D.
1928, are requested to file with the
undersigned by the 15th day of
June, A.D. 1928, a full statement,
duly verified of their claim and of
any security held by them and
after that date, the Executors of
her Will will distribute the assets
of the Deceased among the parties
entitled thereto, having regard
only to the claims of which notice
has been so filed or brought to
their knowledge.

Dated this 1st day of May, A.D.
1928.

JOS. J. GREENAN,
Solicitor for the Executors,
Carbon, Alberta.

Compare Prices
CHRYSLER AND ITS COMPETITORS
See how close the "52" matches up with the
Low-Priced Cars

Chrysler 52	Chevrolet	Difference
4-door sedan \$930	\$835	\$95 more
" " "	Dodge \$1135	\$265 less
" " "	Pontiac \$1040	\$110 less
" " "	Ford \$ 740	\$190 more
" " "	Essex \$ 993.60	\$63.60 less
" " "	Star \$ 940	\$10 less

This accounts for the Chrysler crawling up gradually to first
place in sales, because of the greatest value for the money.

THE HORSESHOE BRAND
If you want the best value in Boots, Shoes or Harness
see that they are marked with the Horseshoe. This indicates
that the best leather is used. Only the best quality goods are
marked with this brand.

W. A. BRAISHER

Consider Facts
A farm with a convenient practical house and a well equip-
ped barn will always sell for a higher price.
No matter how large or small or what type of structure you
contemplate erecting, it will pay you to consult with us. Our
trade knowledge and experience is yours for the asking.
Inquiries into the use and abuse of farm implements reveal
that in many cases they rust out before they wear out. A build-
ing that doubles the life of your expensive machinery is a
profitable investment rather than an expense.
